Cerritos Piano Tuner LLC Terms of Service

1. Rates. The price of each service is written in on this form and agreed before work begins. Current prices are listed at ryanellisonpiano.github.io/ryanellisonpiano-site. Other work is billed at the hourly rate and minimum service call on the current price list, confirmed before work begins. Parts and materials are additional unless stated.

2. Payment. Payment is due at the time of service unless arranged in writing. Accepted: cash, check, Zelle (657) 438-4984, Venmo @cerritospianotuner, and credit cards. D.S.H. Maintenance (Disklavier, Silent and Hybrid pianos) is prepaid in full by credit card when the appointment is booked and is applied to the final bill. If the customer cancels or reschedules with at least 24 hours' notice, the prepayment is refunded or applied to the new date.

3. Insurance. Cerritos Piano Tuner LLC ("Servicer") carries business liability insurance. A certificate of insurance is available on request.

4. Condition of the piano and inherent risks. Pianos are delicate instruments under very high string tension. Tuning, pitch correction and regulation can cause aged, worn, rusted or brittle parts to fail, including strings, tuning pins, pinblocks, bridges, soundboards, hammers and action parts. Pianos older than 10 years are at higher risk, and some structural damage can render a piano unusable. Servicer will tell the customer of known risks before proceeding where practical, and the customer authorizes the work with that understanding.

5. Limits of responsibility. Servicer is not responsible for breakage, failure or damage that results from pre-existing conditions, age, normal wear, or the inherent risks described in section 4, when the work is performed with reasonable care. Nothing in this agreement limits Servicer's responsibility for gross negligence, willful misconduct, fraud or violation of law, or any right that cannot be waived under California law.

6. Repairs. Servicer will make every effort to repair damage when it occurs. Repairs are billed at the rates above plus parts, except where the damage results from Servicer's negligence.

7. Tuning stability. How long a tuning holds depends on humidity, temperature, moving the piano and its condition. Servicer does not guarantee how long a tuning will hold.

☐ **I have read and agree to the Terms of Service and authorize the work selected above.**
